

# The best meals on boats are cooked with marinegas cuisine

FIRST IN THE WORLD

## A special lpg cylinder for boat kitchens

Marinegas is a different form of the environment-friendly and economical LPG which is used at sea. This major innovation supplies energy to the kitchen with its marinegas cuisine form.

Marinegas cuisine is ready for your order to create miracles in your boat kitchen.

### Features and superiority of marinegas

Sea conditions are tough. The kitchen LPG cylinder used at present has not been designed according to conditions at sea and creates safety and corrosion problems.

**Marinegas is the solution to these problems.**

Marinegas cuisine cylinder designed by İpragaz to be used on boat kitchens is the first of its kind in the world.

## Special Footring

The bottom surface is covered by high quality footing to increase surface adherence and resistance to corrosion. Increase in surface adherence minimizes the risks of sliding or overturning which are major problems on board. The footing of the cylinder prevents corrosion resulting from contact with wet or damp surfaces and eliminates the problem of rust stains.

## Handwheel Valve

The risk of gas leakage has been eliminated and safe usage has been ensured.

## Powder Coating

Cylinders are covered with powder paint which is resistant to sea conditions, to scratches and hits.

## New Design

The 2 kg. cylinder has been designed particularly for sailing boats and small boats where space is limited and ergonomics is important.

## Types of marinegas cuisine

Marinegas is available in 2 kg and 12 kg cylinders which you can use with assurance in your boat kitchen.

2 kg  
and  
12 kg

## First In The World

Considering the problems of using LPG cylinders on boats İpragaz accomplished something that was not done before and produced marinegas cuisine specially for mariners.
